The public spaces at Scout Capital Management are eco-friendly, soft and modern.

environment. The company recently worked with New York-based, Scout Capital Management, to provide a practical yet contemporary look for its busy hedge fund offices. Along with designer, S. Russell Groves, the team selected Eco-Cem™, as an eco-friendly, refined solution for the office entryway, hallways and corridors.

“Scout Capital Management wanted to take a green approach to its design and keep the space modern,” noted Romina Frecha, of Coverings Etc. “Eco-Cem is unique because it provides a current look yet the material maintains the warm feeling of wood. By using Eco-Cem we were able to add softness to the design.”

Eco-Cem is manufactured with processes sensitive to conservation and natural resources. It is made of

cement strengthened with cellulose fibers and contains up to 20% post consumer recycled and 40% post industrial recycled content. This combination makes the material extremely durable as flooring, exterior cladding, on countertops or as an accent to furniture.

Additionally with the growing trend in bio-architecture, Eco-Cem is a popular fit for commercial spaces as well as ecologically-minded homeowners. ■
