Bio-Glass™ is a valuable ecologically-intelligent material which offers a low environmental impact solution without compromising on aesthetics.

Bio-Glass™ solid surfacing for countertops, walls, floors, and other applications is made from **100% recycled glass**, heated and agglomerated under pressure.

Bio-Glass™ contains **no binders, colorants, fillers, or other admixtures**. Depending on color, the product is either pre- or post-consumer content, or a blend. The translucent, **nonporous** material is available as 110-inch by 47-inch slabs, about 4.7 inches thick with a lightly textured, slip-resistant surface; smooth-surfaced slabs are also available.

Total recycled content: 100%
Post-consumer content: 100%
LEED Points: MR 4 - recycled content
Certification: Cradle to Cradle
