

Bio-Glass

Bio-Glass
 Wins Architectural Products Magazine
 Product Innovative Award (PIA 2012)

PIA'12 • The 2012 Architectural Products
 Product Innovation Awards

Bio-Glass is the recipient of *Architectural Products Magazine's* 2012 *Product Innovation Award (PIA)*. The Architectural Products Product Innovation Awards (PIAs) determine and honor innovation in the development and refinement of buildings-related products that range the gamut from cladding systems to interior finishes. "Judged by a group of 50 independent industry professionals, the program represents a mechanism to impartially review product and present to readers items their peers found innovative and worth investigating. *Bio-Glass*, combining unparalleled design and 100% post consumer recycled content was a clear winner", said Jim Crockett, Editorial Director – Architectural Products Magazine.

Eco-Terr

Eco-Terr
 Reflects Fresh Comfortable Luxury in
 Miami Residence

When photographer extraordinaire *Tomas Loewy* set out to design his highly anticipated apartment in the *Lenny Kravitz* envisioned *Paramount Bay Condominium* in Miami, *Eco-Terr* terrazzo was the first thing that came to mind. *Eco-Terr* seamlessly blends urban chic with waterfront living at the pristine 47-story condominium which provides breathtaking views of Miami, Biscayne Bay, and the Beach. Loewy chose "*Venetian Beach*" in a polished finish to cover his entire 1800sf apartment and expands the same color in a brushed finish onto his 2 balconies. Loewy is also a fan of the fact that *Eco-Terr* is recycled as he wanted to go as green as possible. "I wanted terrazzo and this one (*Venetian Beach*) is simply beautiful....it gets lots of compliments from visitors", enthuses Loewy.
